**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

1. The following is an Examiner's statement of reasons for the indication of allowable subject matter: The prior art of record does not disclose, make obvious, or otherwise suggest the structure of the applicant's prediction program, prediction apparatus, and prediction method together with the other limitations of the independent claims.

The dependent claims being further limiting and definite are also allowable. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Authorization for this examiner's amendment was given in an interview with Robert R Sachs and John P. Wagner on August 24, 2011.

**AMENDMENT TO THE CLAIMS:**

Claims 69-70, 74, 85, and 110 are amended. Claims 60-61, 69-106, and 110-111 remain pending in the application.

**WHAT IS CLAIMED IS:**

69. (Currently Amended) A ~~tangible~~ non-transitory computer readable storage medium having computer readable code thereon that when executed cause a computer system to perform a method for operating an operational data store, said method comprising:

creating a new partition in a composite-partitioned history table; creating a partitioned temporary table; filling the temporary table with data from an insert table; exchanging the temporary table with the new partition;

receiving queries and applying said queries to both the history table and the insert table; and

throttling transactions of different classes independently to achieve a desired level of service.

70. (Currently Amended) A computer system for producing a desired level of service in a mixed workload environment, comprising:

a processor;

a high-speed insert operational data store (ODS);

a throttler for throttling selected transactions to the ODS and for throttling transactions of different classes independently to achieve a desired level of service; and

an aggregator for accumulating transactions into batches and inserting each of the batches into the ODS using a single database transaction per batch.

74. (Currently Amended) A computer system comprising an operational data store, wherein said computer system comprises:

a processor;

an insert table for storing new data;

a history table for storing historical data, said history table comprises:

a number of partitions, wherein each of said number of partitions is partitioned into a number of sub-partitions equal to the number of database server instances, and

wherein said history table is partitioned into at least one of said number of partitions by a range; and

transfer logic for periodically transferring new data from the insert table to the history table.

85. (Currently Amended) A computer system comprising an operational data store, wherein said computer system comprising:

a processor;

an insert table for storing new data;

a history table for storing historical data;

transfer logic for periodically transferring new data from the insert table to the history table; and

a throttler for throttling transactions of different classes independently to achieve a desired level of service.

110. (Currently Amended) A ~~tangible~~ non-transitory computer readable storage medium having computer readable code thereon that when executed cause a computer system to perform a method for operating an operational data store, said method comprising:

inserting new data into an insert table;

periodically transferring data from the insert table to a history table;

applying a database query to both the history table and the insert table; and

throttling transactions of different types independently to achieve a desired level of service.

***Reasons for Allowance***

2. Claims 60-61, 69-106, and 110-111 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter: the prior arts of records, neither anticipates nor renders obvious the following limitations as claimed:

As to claims 60 and 69, the prior art of records fail to anticipate or suggest a method for operating an operational data store, comprising:

creating a new partition in a composite-partitioned history table; creating a partitioned temporary table; filling the temporary table with data from an insert table; exchanging the temporary table with the new partition;

receiving a query and applying the query to both the history table and the insert table; and

throttling transactions of different classes independently to achieve a desired level of service, together with the other limitations of the dependent claims.

As to claims 70 and 72, the prior art of records fail to anticipate or suggest a throttler for throttling selected transactions to the ODS and for throttling transactions of

different classes independently to achieve a desired level of service; and an aggregator for accumulating transactions into batches and inserting each of the batches into the ODS using a single database transaction per batch.

As to claims 74 and 91, the prior art of records fail to anticipate or suggest a number of partitions, wherein each of said number of partitions is partitioned into a number of sub-partitions equal to the number of database server instances, and wherein said history table is partitioned into at least one of said number of partitions by a range; and

transfer logic for periodically transferring new data from the insert table to the history table.

As to claims 85, 102, and 110, the prior art of records fail to anticipate or suggest transfer logic for periodically transferring new data from the insert table to the history table; and a throttler for throttling transactions of different classes independently to achieve a desired level of service.

The dependent claims 61, 71, 73, 75-84, 86-90, 92-101, 103-106, and 111 being definite, enable by the specification, and further limiting to the independent claim, are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
